Subject - Raynette Gergory applying for Board seat.

Dear Board of Directors

I am writing as a resident of San Miguel to formally protest the appointment of Raynette Gregory to the Board of Directors. Mrs. Gregory's actions when she called the hospital of the late Director John Green while he was on his death bed was appalling. He sadly passed away a few days later. She is now applying to take his seat. I find it ironic! Allegedly Raynette Gregory is actively suing the CSD connected to the Steinbeck Case. Is this true? I also saw that there was a large Sulfuric Acid spill on her winery that ran into the ground and storm drain that leads to the river per the CalCoastNews article titled “Sulfuric acid spill leads to hazmat cleanup near San Miguel March 27, 2021”. Sulfuric Acid releases heavy metals that are trapped in rocks that leach into the ground water over time. Things like **arsenic, cobalt, copper, cadmium, lead, mercury, and zinc**. I formally want to say that I do not think Raynette Gregory is a good fit for the Board of Directors. Someone who is suing the board while being on the board...is a conflict of interest. Again, is she connected in any way to the Steinbeck lawsuit for the water?

-Shaunna

San Miguel resident.
